ROTATING TOOL CLAMP

The clamp can be added to the articulating arm. The rotating tool clamp provides an operator flexibility to adjust and move the power tool into various positions for the fastening process. The rotating clamp provides for both vertical and horizontal range of movement. Choose between either a fixed position or up to 90 degrees of range in either orientation.

Item #	Models
260446	Rotating Tool Clamp (for ATS-15, ATS-25 & LTS-15 torque arms)
260447	Rotating Tool Clamp (for LTS-25, LTS-40 & ATS-40 torque arms)
260448	Rotating Tool Clamp (for ATS-80 & LTS-80 torque arms)
